Have you ever wanted to learn how to make Belgian pies? Here is your chance! Joanne will convince you that this is easy as pie! She will share recipes with all participants, provide two fillings, pie tins, and all ingredients. Participants will make and work with dough; pies will be baked in class. All you need to bring is an apron, appetite, and the ability to take two pies home with you!

Walk in our Door 44 Vineyard where we will discuss everything from soil to glass, as well as how and why we grow and make the wine we do. We will eventually end up in the production area. Along the way, we will sample five different wines and demonstrate the five S's of wine appreciation. We will discuss the basics of wine growing and wine making but also delve into topics such as terroir, wine appellations, and wine chemistry, in other words, the joy of wine.

Carl Cochrane, retired biology/ environmental science teacher from Sturgeon Bay High School, knows the Ship Canal Preserve like no one else. Join Carl as he leads a relaxed walking tour of the preserve, pointing out its unique topography, endangered plant and animal species, and the fascinating human history of the largest tract of undeveloped land within the city limits. The hike over uneven terrain, is about 1.5 miles; may be standing for long periods of time. Map and directions will be emailed to participants.

A two-session approach to basic drawing with a couple of different media on paper. This is an enjoyable way to learn to really look at an object, find its special characteristics and make your mark! In session one, we'll work with familiar objects and experiment with different mark-making media until you find one that's most comfortable to you. In the second session, we'll look further into recording what you see by looking at proportions, drawing each other, and having a brief review of what you've learned. Paper and drawing materials provided.

Learn to weave a basket from beautifully painted paper. In the first session you will be painting your paper using a variety of acrylic paints. The other two sessions will be devoted to weaving the paper into a cat-head style basket that is a perfect size to use on a table or as a candy dish or to hold artificial flowers. No prior weaving experience is necessary. All necessary materials are provided. Baskets can be decorated with beads (not provided.) Contact presenter at bayshorebaskets@yahoo.com prior to class for information on bead sizes and quantities, which will be discussed during the first class.

. Wear old clothes. Bring stamps, sponges, or special brushes if you like; paint and basic brushes will be provided. You will be painting your own paper for your basket, and it can get messy!

. bring a pencil, ruler, or tape measure (measure up to 6 inches), and sharp scissors for paper. Paper, floss, and other tools will be provided.

This course delves into the transformative world of fiber optic technology, spotlighting the project to connect Washington Island with high-speed internet. This enlightening course covers the fundamentals of how fiber optics utilize light to transmit data through glass or plastic fibers, vastly outperforming traditional copper wires in speed and reliability. Participants will receive an in-depth explanation of GPON (Gigabit Passive Optical Networks), a key technology enabling efficient high-speed internet distribution. Additionally, a live splicing demonstration will provide a hands-on look at the precision required to join fiber optic cables, ensuring seamless data transmission. This course aims to demystify fiber optic technology, highlighting its critical role in modern telecommunications and the technical achievements of projects like Washington Island's connectivity initiative.

A course designed to empower homeowners with the knowledge and tools necessary for robust home security. This concise program delves into the latest in physical security technologies, from advanced surveillance cameras to smart doorbells and integrated security systems, providing participants with the know-how to choose, install, and manage these devices effectively. Course attendees will explore the benefits and functionalities of various security solutions, learn about the importance of strategic placement, and receive guidance on privacy considerations and digital security integration. Suitable for those new to home security or looking to update their current systems, the course combines expert-led presentations with practical demonstrations, ensuring homeowners are well-equipped to enhance the safety and security of their homes in the digital age.
